SUMMARY

IIT Madras BS in Data Science student with experience training scikit-learn classifiers and deploying Python applications with Streamlit. Hands-on work with feature scaling, model evaluation, and interactive web tools. Seeking a Data Science or Machine Learning internship.

EDUCATION

Indian Institute of Technology Madras | Jan 2025 - Present

BS in Data Science (in progress)

Coursework: Mathematics, Statistics, Computational Thinking, Python

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript, TypeScript

Data Science & ML: Pandas, NumPy, scikit-learn, support vector machines (SVM), model evaluation

Visualization & Applications: Matplotlib, Seaborn, Streamlit, React

Development Tools: Git, GitHub, Vercel, Streamlit Community Cloud

EXPERIENCE

AI Intern | Edunet Foundation

Jan 2025 - Mar 2025 | Remote

- Developed a Python machine learning application for heart disease, diabetes, and Parkinson's prediction as an internship project.
- Built Streamlit interfaces for entering health-related inputs and displaying model predictions.
- Created data visualizations with Matplotlib and Seaborn and deployed the application on Streamlit Community Cloud.

PROJECTS

AI Clinical Suite | Python, scikit-learn, Pandas, Streamlit

Live: clinical-ai-diagnostic-suite.streamlit.app | Source code

- Trained linear SVM classifiers using stratified 80/20 train/test splits; fitted StandardScaler on training data and evaluated accuracy on held-out test data.
- Saved models and fitted scalers for reuse in Streamlit, applying the same preprocessing to user inputs before inference.

IITM Scholar Hub | React, TypeScript, Vercel

Live: iitm-scholar-hub.vercel.app

- Built a student toolkit with end-term marks prediction, grade calculation, and CGPA calculation to support academic planning.
- Developed a responsive interface and deployed the application on Vercel for browser-based access across devices.

TRAINING

Full Stack Web Development | PW Skills | Completed 2024

AI and Machine Learning | ISRO | Participation
