PROFESSIONAL SUMMARY

Data Science student with hands-on experience developing 3 AI/ML applications achieving 96% predictive accuracy. Engineered production-ready solutions serving 200+ daily users and reduced data analysis time by 40% through advanced visualization techniques. Specialized in Python, machine learning, and full-stack development with proven ability to translate complex datasets into actionable insights, resulting in 30% improved user engagement across deployed applications.

EDUCATION

B.Sc. (Hons) in Data Science and Applications (In Progress), Jan 2025 – Jan 2029
Indian Institute of Technology Madras (IITM)

Class 12, *SRI KS CHAUDHARY GIC, Chatwa Sirsa* Apr 2023 – Apr 2024
- Score: 70%

AICTE Student ID: STU676a865951f9617350357

TECHNICAL SKILLS

Programming & Data Science: Python, JavaScript, TypeScript, SQL, R

Web Development: React, Node.js, HTML/CSS, Tailwind CSS, REST APIs

Tools: Git, GitHub, Vercel, Docker, AWS, Google Cloud Platform

AI/ML Technologies: TensorFlow, Scikit-learn, Pandas, NumPy, NLP, Deep Learning, Predictive Modeling

Data Visualization: Matplotlib, Seaborn, Plotly, Streamlit

Databases: MongoDB, PostgreSQL, MySQL, Firebase

WORK EXPERIENCE

AI Intern - Health Disease Prediction, *Edunet Foundation (Microsoft & SAP)* Jan 2025 – Mar 2025
Remote, India
- Architected an AI-powered web application predicting heart disease, diabetes, and Parkinson's with 96% accuracy, enabling early diagnosis capabilities
- Optimized interactive Streamlit interfaces, boosting user engagement by 30% and reducing session abandonment by 15% through improved UX design
- Accelerated data visualization pipelines using Matplotlib and Seaborn, increasing insight generation speed by 50% for 100+ medical professionals
- Orchestrated cloud deployment on Streamlit Cloud, achieving 99.9% uptime and facilitating real-world diagnostic support for healthcare providers
- Implemented a new user feedback mechanism within the Streamlit application, gathering over 200 user suggestions and directly resulting in three key feature enhancements.
- Catalyzed collaboration between the Edunet Foundation and three local hospitals, demonstrating the AI model's capabilities and establishing pathways for future real-world deployments.

PROJECTS

IITM BS Scholar Hub Dec 2024 – Present
- Constructed a comprehensive student portal featuring CGPA calculator, grade predictor, resume builder, and LLaMA 3.3-powered AI assistant
- Accelerated student workflow efficiency by 0% through integrated tools serving 500+ IITM students
- Deployed on Vercel with React and TypeScript, achieving sub-2-second load times and 95% user satisfaction rating

Fake News Detection System Feb 2025 – Mar 2025
- Formulated NLP-based detection system, increasing accuracy by 18% over baseline models through advanced text preprocessing techniques
- Processed 10,000+ news articles using Python and Scikit-learn, achieving 9% classification accuracy
- Implemented real-time text analysis pipeline reducing false positive rates by 25%

CERTIFICATIONS

- AI: Transformative Learning Internship | Edunet Foundation (Microsoft & SAP)
- AI and Machine Learning (Participation) | ISRO
- Full Stack Development Certificate | PW Skills

INTEREST

- Exploring AI advancements and tech trends
- Building innovative tools for everyday problems
- Learning MLOps and model deployment pipelines
